Yoga Based Spine-Friendly Chair

Under the guidance of ergonomics, H2 offers common but differentiated support for cervical vertebra, thoracic vertebrae, the lumbar vertebra.

H2

Move with your body

30-degree synchronous swing from side to side makes H2 fit your body like a glove, activating the hidden functions of your waist and relieving your pressure effortlessly.

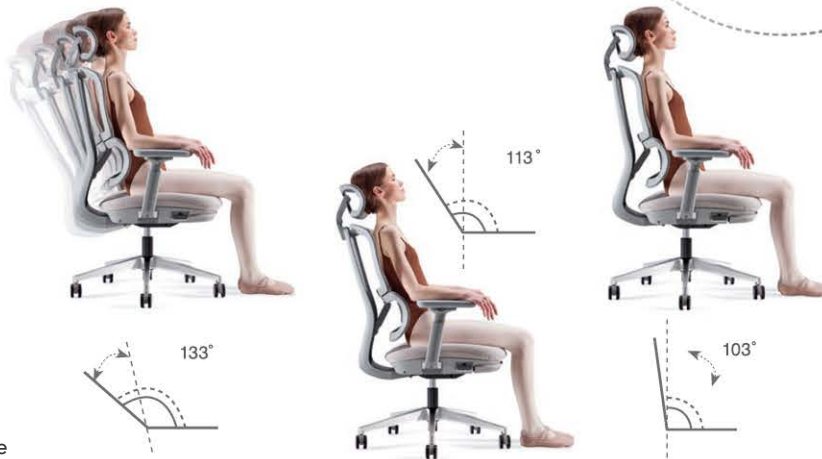

Offer long-lasting comfort

H2 balances superior lower back support with a timeless, inspired design to enable high performance for people at work.

Flexible tilting adjustment

4-gear tilting adjustment brings less machine and more human, satisfying the needs for working, meditating, reading and lunch breaking; 55mm seat depth adjustment flexibly accommodates people of different body shapes.

Small

Internal Pressure on Lambar Disc

Big

Winger

The right sitting posture can reduce the cervical spondylosis and lumbar spondylosis morbidity by 40% at least. Winger adopts the design of ergonomics and its multifunctional waist holder and adjustable head pillow can be flexibly regulated. It perfectly matches the cervical and lumbar vertebra curves to ensure comfortable and correct sitting posture and fully takes care of your health.

Smart Monitoring

The cushion is equipped with a smart sensor which is used to monitor users' indexes such as pressure distribution, sitting time, heart rate and respiratory rate, etc. Through the data processing center, users can grasp constantly varied body data on a special App.

Health Management

The purpose of data monitoring is to realize health management; The sitting posture and pressure index monitoring helps users cultivate good habits of sitting, thus benefitting the users both physically and mentally; The sitting time monitoring reminds users to avoid long-time working and spare some time to have a rest; The respiratory rate and heart rate monitoring helps users realize their health status and take timely measures; the chair truly serves users' health with science & technology and wisdom.
